COMPANY PORTFOLIO · 2026

One company. Four capabilities.

AJGROUP is the brand of **A-J TRUCK, LLC**, a California-based company headquartered in El Cajon. Under one accountable legal entity we bring together operational logistics, government procurement, cybersecurity, and international representation — supporting mission-critical work for U.S. agencies and allied government clients across the Middle East.

Founded in December 2015, the company has grown from a transportation and logistics operator into a multi-disciplinary government contractor. Each line of business operates as a focused division, so agencies and prime contractors work with one partner across freight, procurement, secure systems, and representation — pairing small-business agility with the compliance discipline that federal and international engagements demand.

COMPANY AT A GLANCE

Who we serve & why teams partner with us

WHO WE SERVE

State & local governments — California and nationwide

U.S. embassies and overseas missions in the MENA region

Prime contractors seeking qualified teaming partners

Middle East government ministries (through JCCS authorization)

WHY PARTNER WITH US

→ California-based LLC with nationwide and MENA operational reach

→ Active SAM.gov registration and full federal compliance posture

→ Proven across both commercial and government environments

→ Small-business agility with professional execution standards

→ Strong focus on compliance, security, and reliability

OUR APPROACH

We structure each engagement around clear scope, measurable deliverables, and disciplined reporting. For international work, we combine on-the-ground relationships across Iraq and the wider MENA region with U.S. compliance practices — giving agencies and prime contractors a single partner who can mobilize quickly while meeting the documentation and security expectations of government work.
